Title: *An Abiding Internal Threat: The Dark Money Cabal Manipulating the Federal Government*

Outline:

- Do we really think Joe Biden was calling the shots when he was president? The real story involves a network of leftist nonprofits that fed woke ideas into the federal government. These NGOs called for an open border, and the administration delivered.
- One of the greatest threats to our national security is the Left’s obsession with immigration (by all means) and with effectively no limits. How many on the terrorist watchlist crossed the border under Biden? The Left’s belief that unfettered immigration helps them politically—whether true or not—weakens our security.

- The Leftist nonprofits' radical agenda makes America weak, not just by opening the border but by promoting divisive social ideologies and leading us to tie down the forms of energy that are most reliable.
- Alexandria Ocasio-Cortez has let slip that the insanity of the Biden years is only "Woke 1" in her mind. The permanent apparatus of the Left would like nothing better than to take the helm again under a new president.

Action Items:

- Keep an eye out for leftist nonprofits being promoted as charity, and call it out when you can, especially in your own companies, schools, and other associations
- Remember that when you vote, you don't just vote for the president at the top of the ticket, but for a host of people below him or her, and for a slate of policies that will make us stronger or weaker as a country.
- Support America's good heritage in every way that you can and combat the ideological divisions inherent in critical race theory.
